

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)
Department of Computer Science and Engineering

ASSESSMENT TOOL 1 –CODING GOLF COMPETITION

Course Code: CO	CSA0309	Course Title:	Data Structures
Assessed:	CO4 – Articulation (BL3)	Assessment:	Assessment Tool 1 – Coding Golf Competition
Weightage:	35% of CIA	Total Marks:	100
CO4 Statement:	<i>Apply hashing strategies for efficient data storage and sorting algorithms for arrangement of data.</i>		
Student Name:	Bhuvaneshwaran J	Reg. No.:	192511402
Section / Batch:	Slot B	Date:	14/08/2024

Code of Conduct

I Bhuvaneshwaran J(192511402) (Name / Reg No)

certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: Bhuvaneshwaran J

Instructions

- Log in to the assigned coding platform - Code chef (<https://www.codechef.com/skill-test/c-language-dsa>). Total: 100 Marks.
- You can only attempt this assessment once. Also, you will not be able to pause the assessment after starting.
- You are not allowed to switch tabs during the assessment, otherwise you will be blocked from the assessment.
- You will get a detailed report on your performance at the end of the assessment.

Section / Topic	Focus	Q Nos	Marks
Data structures	Code Chef	28	100
GRAND TOTAL:		100 Marks	

Rubrics for Calculation

Criteria	Weightage	Level 4 – Exemplary Accurately interprets all problem requirements and constraints before coding. Program compiles successfully and passes all hidden and visible test cases. Selects the most appropriate data structure and algorithm with an optimized solution.	Level 3 – Proficient Understands most requirements with minor omissions. Program passes most test cases with minor errors. Chooses an appropriate solution with minor inefficiencies.	Level 2 – Developing Partially understands the problem; misses some constraints. Program passes some test cases but has logical issues. Uses a workable but less efficient approach.	Level 1 – Beginning Misinterprets the problem or ignores key requirements. Program fails to compile or produces incorrect results. Uses an inappropriate data structure or algorithm.
Problem Understanding	20				
Correctness of Solution	30				
Data Structure & Algorithm Selection	20				
Code Quality & Documentation	20	Well-structured, modular, readable, and properly indented code with meaningful identifiers.	Readable code with minor formatting issues.	Basic coding style with inconsistent formatting.	Poorly organized code that is difficult to understand.
Time & Space Optimization	10	Demonstrates excellent optimization and correctly analyses time and space complexity.	Good optimization with minor inefficiencies.	Limited optimization and incomplete complexity analysis.	No optimization and incorrect or missing complexity analysis.
